- Test development languages **Java and Python**.
- Mobile testing
- API Testing
- Exposure to various types of testing techniques like smoke, Adhoc , compatibility, Regression, Load Testing and Performance Testing etc.
- Basic knowledge on Docker and Kubernetes.
- Hybrid cloud Management for various public providers like **Amazon Web Services, Microsoft Azure, IBM Cloud and Google Cloud Platform.**
- Defect Reporting and Tracking using **JIRA** as Defect management tool.

—

Experience

IBM Software Labs / Software Developer

SEP 2016 - PRESENT, Bengaluru, IN

Part of hybrid cloud management team, which is responsible to build solutions catering to the needs of cloud brokerage and management.

Cloud management application lets the user add his public or private cloud accounts into the system. The system then extracts the data from these accounts and is able to display the assets, expenditure, insights across different predefined metrics. The application makes use of the microservice architecture where the user interface, API services and the analytics engine are deployed on a kubernetes instance.

Cloud brokerage application again is a microservice based application where the user is presented with a set of questionnaire to understand his application needs. Based on the answers the user is presented with a summary of what kind of cloud setup he should use and the feasibility of moving his existing applications to the cloud. At the end, the application also compares the prices of various public, private cloud providers for the services asked and helps him to take an informed decision.

Cognizant Technology Solutions / Associate

MAY 2012 – AUG 2016, Bengaluru, IN

Worked in 3 projects under this organization- **C360 Cloud,CVS Health Care and PepsiCo-ETC**

- **C360 :** Direct interaction with the various clients associated with Cognizant Cloud team (C360) .Consulted with quality and development engineers in resolution of complex problems. Worked on Production environment for the integration testing of third party tool. Hybrid cloud management for various Cloud Computing portals like AWS,VMWARE.
- **CVS Health Care**: Handle content migration of US region for Cognizant's Health Care division..Drive product agnostic technical consulting to help clients with the best-fit solution. Got the complete migration done within few weeks and provided a sign-off to the client.
- **PepsiCo-ETC**: Cognizant developed Pepsico website was handled from offshore. Various roles were done to get the website working in an efficient way. Performed agile testing for the pepsico websites. Application and Content Management. QC version upgradation from 10.0 to 11.0
